Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18 drawn to computer graphics processing system, more specifically to graphics memory used for storing texture and other attribute information where the information is added to the "surface" of a graphical image classified in class 345, subclass 552.

II. Claims 19-22, drawn to computer graphics commands processing system, a host computer issues commands to graphics processing system to perform operations classified in class 345, subclass 520.

III. Claims 23-27, drawn to computer graphics processing system, more particularly using instruction to manipulate graphics image, classified in class 345, subclass 561.

IV. Claims 28-37, drawn to computer graphics system, specifically to integrated circuits, wherein one or more of the components of a graphic processing systems are composed on an single semiconductor chip.; classified in class 345, subclass 519.

Inventions I, II, III, and IV are related as usable together in a single combination.

The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as storing texture descriptor, this is a patentably feature not found in invention II, III or IV. Invention III has separate utility such using instruction to manipulate graphics image; this too is a patentably feature not found in inventions I, II or IV. Furthermore, invention IV has separate utility such as one or more of the components of a graphic processing systems

are composed on an single semiconductor chip, this is a patentably feature not found in invention I, II or III See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single invention for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
